Be Alert...Saharan dust-haze

Seas: Slight to moderate
1.0m to 1.8m / 3ft to 6ft

Marine Advisory:
Caution...very poor visibility in thick dust-haze

Weather Discussion:

The Saharan dust layer across St.Vincent and the Grenadines (SVG) is currently thick and concentrations could vary over the next few days...*Remain Alert!* Thinning-out of the dust concentrations can be expected overnight Wednesday, with increasing moisture levels and scattered showers across our islands.

Gentle-moderate (15 - 25km/h) breeze across our islands increase occasionally near 30km/h and vary in direction between east north-east and east south-east.

Sea conditions are slight to moderate in open water, with swells ranging 0.5m - 1.0m west of our islands and 1.0m - 2.0m east of our islands...*Small-craft operators should exercise caution due to reduced visibility(poor-very poor) in dust-haze.*

Saharan dust concentrations could thin-out to slight-haze during Thursday.
