## Weather Discussion:

Slight Saharan dust is across the area, with no significant amounts forecast over the weekend. As the shearline exits, relatively fair to partly cloudy conditions are expected over the weekend due to a ridge of high pressure. Mid - upper level instability is forecast on Sunday, however, shower activity if any, could be kept to the east of the island chain.

Easterly trades at 20km/h-30km/h will move across the island chain, backing to east north east on occasion. Seas will be slight to moderate in open waters with swells peaking at 1.0m on the western coasts and 2.0m on the eastern coasts.
