less than 1.0m / 3ft

Marine Advisory:
*Caution...occasional surf
& rip currents*

Seas: Slight in open water
less than 1.0m / 3ft

Marine Advisory:
*Caution...occasional surf
& rip currents*

Weather Discussion:

Lower-level clouds converging across our islands could bring a few showers across St. Vincent and the Grenadines (SVG) tonight. Moisture levels are expected to decrease during Thursday, but occasional lower-level clouds are likely to trigger a few showers and isolated thunderstorms are possible across SVG from late Thursday and into the weekend.

Gentle to moderate (15 - 25km/h) east north-easterlies turn east south-easterly by Thursday.

Marine conditions are slight ranging 0.5m to 1.2m across our islands, gently falling (< 1.0m) late Thursday. Over the next few days, long period waves could occasionally break with life-threatening surf and rip currents along our shores especially around times of high-tide...*Small-craft operators and sea-bathers should continue to exercise caution.*

Tropical Storm Sean appears disorganized in the Atlantic Ocean...Another area of low pressure in the Atlantic Ocean has a 30% chance for development...The St. Vincent and the Grenadines Meteorological Services (SVG MET Services) will continue to monitor the Tropical Atlantic Ocean and issue updates/advisories as necessary.
