hazy-partly cloudy,
isolated showers

Weather
Advisory/Warning:
None

Seas: Slight
0.5m to 1.2m /1.5ft to 4ft

Marine
Advisory/Warning:
None

Weather Discussion:

Mostly cloudy skies, occasional gusty winds and pockets of moderate-heavy showers with thunderstorm activity continue across St. Vincent and the Grenadines (SVG) tonight and decrease early Friday...*Residents and motorists in areas prone to flooding and landslides or near rivers and streams should remain alert.* A few showers are likely across SVG again by late Friday and over the weekend, with occasional cloud patches. Varying concentrations of Saharan dust concentrations could result in slight-moderate haze across our area.

Gentle-moderate (15 - 25km/h) east south-easterlies occasionally gust between 35 to 40km/h and temporarily turn east north-easterly during Saturday morning.

Marine conditions are slight to moderate in open water (1.0m - 2.0m), falling to range 1.0m - 1.5m by Saturday afternoon and 0.5m - 1.2m during Sunday with slight conditions.

A tropical wave is expected in the Eastern Atlantic with 30% chance of development...The St. Vincent and the Grenadines Meteorological Services (SVG MET Services) will continue to monitor the Tropical Atlantic Ocean and issue updates/advisories as necessary.
